Hello, I'm Divya Krishnan,

I am now looking for **FULL STACK DEVELOPER** job and has created and **deployed several websites**. I have experience with reactjs,nodejs,expressjs,javascript,jquery,mongoDB,SQL,docker,jenkins pipeline,aws have deployed in github pages, aws amplify, netlify, etc.

Courses:
* **Python** in Data science - **Grade 93%** - (University of Toronto SCS)
* **Reactjs** and jsx - **Grade 100%** - (University of Toronto SCS)(4 assignments and 1 individual project)
* Undergoing Full Stack Development Bootcamp - (University of Toronto SCS). Cumulative score till date is **Grade - 99%**

Before making a career change, I worked in Test Automation for more than 7+ years in UFT, java,cucumber BDD,python selenium etc. I felt I am missing something in my life in terms of creating something new and my **passion for coding** made me to take up Full Stack Web Development bootcamp course in University of Toronto to realize my dreams of becoming a developer.(Better late than never!)

I am a **constant learner**, I keep upgrading myself with latest technologies.I hope I will be an asset to your company. I am eager to learn more and deliver the best out of my job.

Thank you for looking at my profile. I am eager to share more of my experiences with you in an interview to understand where my skills may come in useful. Thank you for your consideration.

Divya Krishnan
